CPYRGHT

PENTAGON PLANS for a world-wide study of how and why Communists profit by revolutionary change in underdeveloped nations ("Operation Camelot")—now shelved on grounds it might "short-circuit" State Department activities—will return to the active list next month... as a new study.

Fact: Army needs the information to perfect anti-guerrilla tactics, was flabbergasted to learn none had been catalogued. Expect Joints Chiefs to override Defense Secretary McNamara's "compromise" with State, go right over his head to the President for the \$4 million needed for the study. (And LBJ will grant it— with blessings from Central Intelligence Agency boss Adm. William F. "Red" Radborn.)
